

National Center for Primary Care Digital Health Tools Study

Are You a Primary Care Clinician located in
Georgia, Kentucky, North Carolina, or
Tennessee?

WE WANT TO HEAR FROM YOU!

Despite tremendous potential for digital health tools (DHTs) to aid in the advancement of health equity, our prior research has identified gaps in technology adoption that impact high disparity populations.

The goal of the NCPC Digital Health Tools Survey is to assess how adoption and use of DHTs affect underserved communities and health disparities in this region.

**TAKE OUR DIGITAL HEALTH TOOLS SURVEY
PARTICIPANTS WILL RECEIVE A \$50 GIFT CARD**

Visit https://is.gd/Alliant_NCPCDHTSurvey or scan our code to complete the survey.

This program is funded in partnership with the United Health Foundation
